

**IN THE SPECIFICATION:**

Please insert the following one (1) paragraph on page 3, after line 36:

--Figure 5 illustrate details of an example embodiment of a deflector element in conjunction with an adjustment device.--

Please replacement the paragraph beginning on page 9, line 22 with the following replacement paragraph:

--In another exemplary embodiment of the present invention, as illustrated in Figure 5, the particular deflector element 14.1' may be integrated in the movably supported carrier element 13.1, so that one surface of the carrier element 13.1 is arranged as a deflector element, and the movably supported carrier element 13.1 is arranged as an adjusting device. To this end, analogously to the above example embodiment, the carrier element 13.1 may be cylindrical and, on at least one longitudinal end, may have a chamfer which is arranged directly as a deflector element 14.1'. For example, in this case, the carrier element 13.1 may be made of glass and the chamfer suitably polished or heat-treated in order to ensure sufficient reflectivity. Alternatively, a suitable metal having adequate reflective properties may also be provided.--.
